STREAMLINED COMMUNICATION AND PRIORITY SUPPORT IS A NECESSITY.

WE CAN HELP

PRESENTING
UNIFILLER+

A way to navigate the hurdles that come up in the day-to-day running of a production plant.
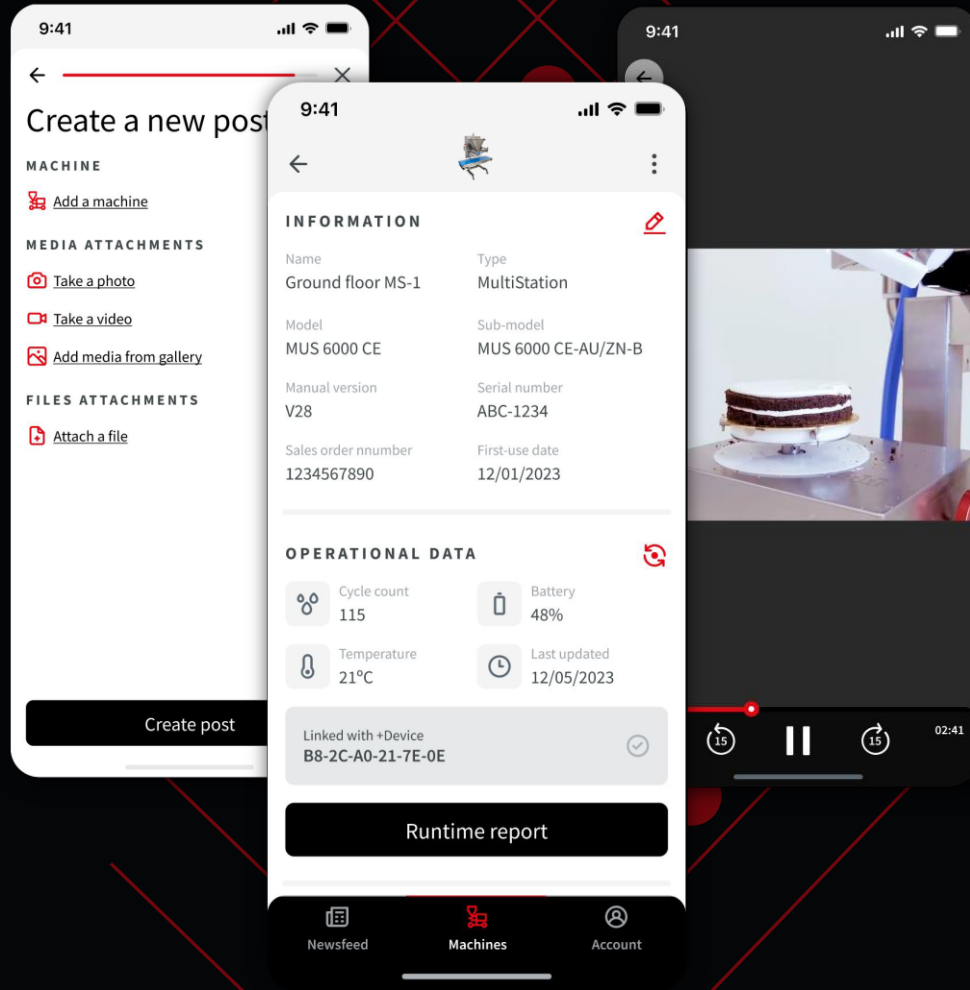

A SECRET WEAPON

Our App acts as a bridge connecting people with the processes and tools needed to do their jobs.

Use it for:
- ✓ Training
- ✓ Process Management
- ✓ Parts & Manuals
- ✓ Service
- ✓ Predictive Maintenance

MANAGE IT ALL
WITH UNIFILLER+

GENERAL LABOR USER STORY

"During the installation of our new Unifiller equipment I became overwhelmed. We have many SKUs to set up, and there is a lot to learn in a short period of time.

I asked the Unifiller Service Technician, "How am I going to manage this system once you are gone? I'm worried that we will forget all the important information and training."
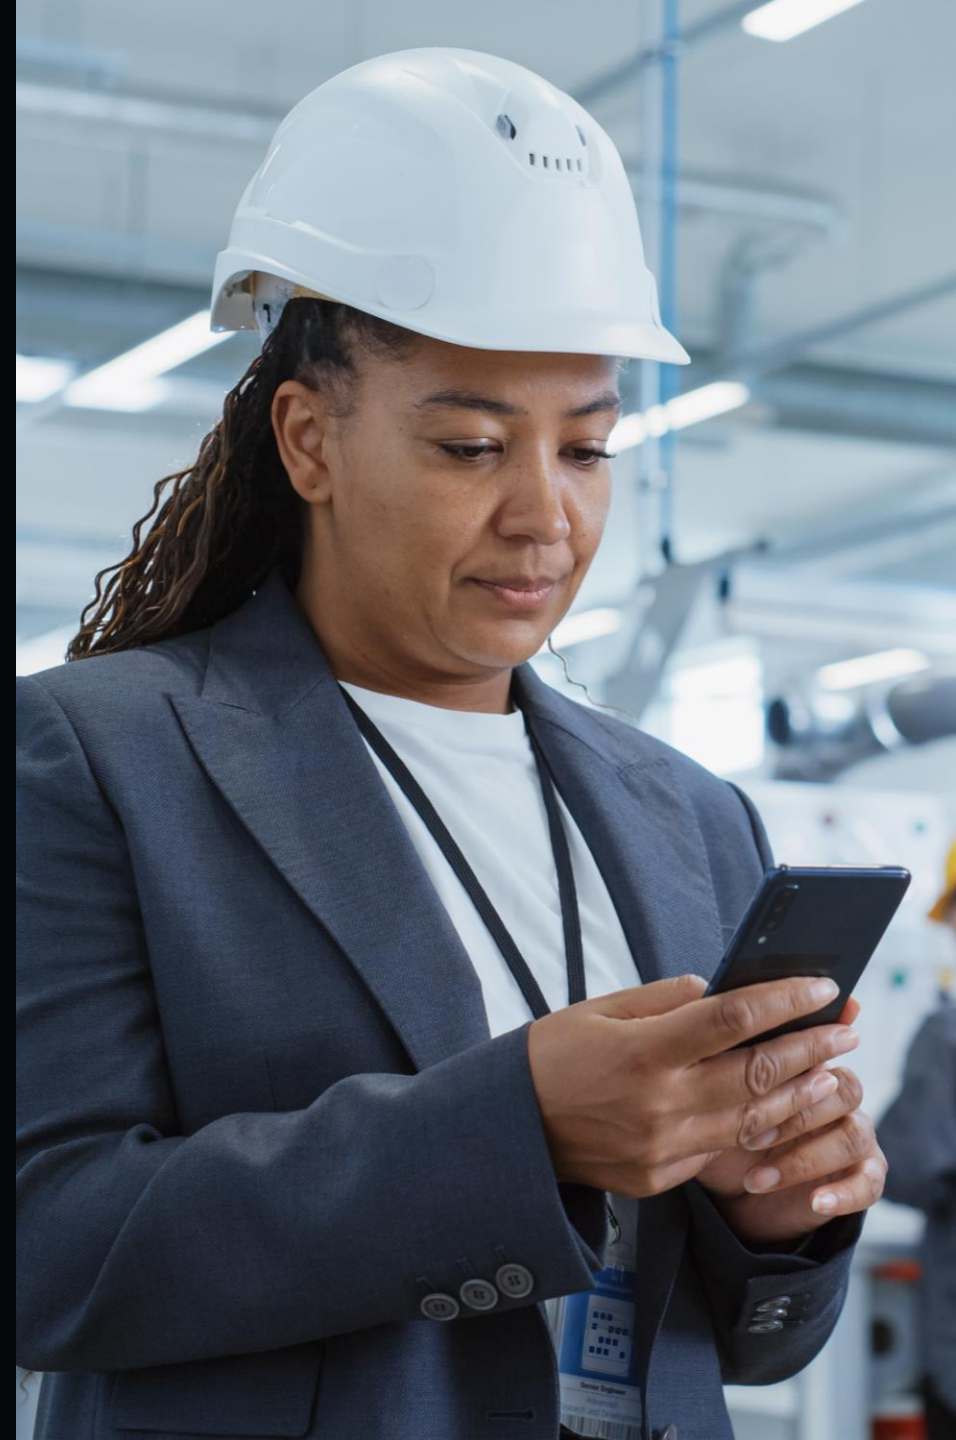

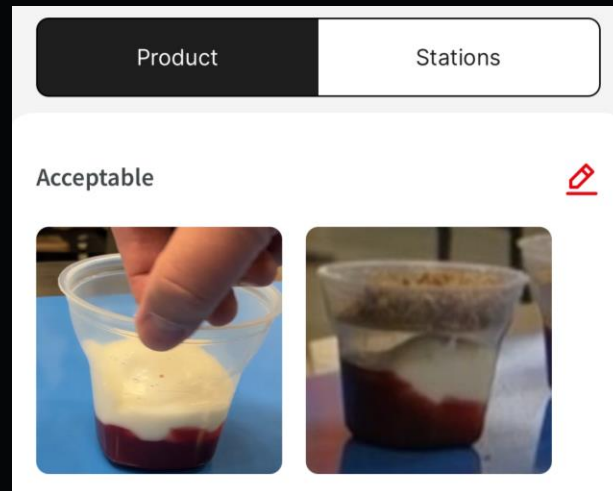

The Service Tech showed me how the Unifiller+ App can document our production Processes, and once I saw how easy it was to set up and maintain, I really felt like I could take ownership of the system and manage the team effectively.

With the Unifiller+ Process Feature I was able to document the equipment settings, include important notes about our unique products, showcase quality expectation, create training documentation and easily share maintenance information with my team."

QUALITY CONTROL MANAGER USER STORY

"I'm a Quality Control Manager and I love using the Unifiller+ App because it allows me to instantly post and communicate with the entire production team. With Unifiller+ we can easily and proactively manage quality while, minimizing waste.

The in-app communication system allows my team to collaborate and communicate effectively by posting pictures and videos, document solutions and clearly define the quality expectations for our product."

PRODUCTION MANAGER USER STORY

"During my first week on the job as Production Manager I was asked to set up our Unifiller equipment to run our 4th of July specialty product. I was lost and no one seemed to remember how to get going since much of the staff were new to the company.

I opened my Unifiller+ App, and there it was! All our processes were documented in the process tab. I was easily able to get all the machines set up and running our red, white and blue SKU.

I don't know what I would have done without the Unifiller+ App to guide me through the machine settings!"
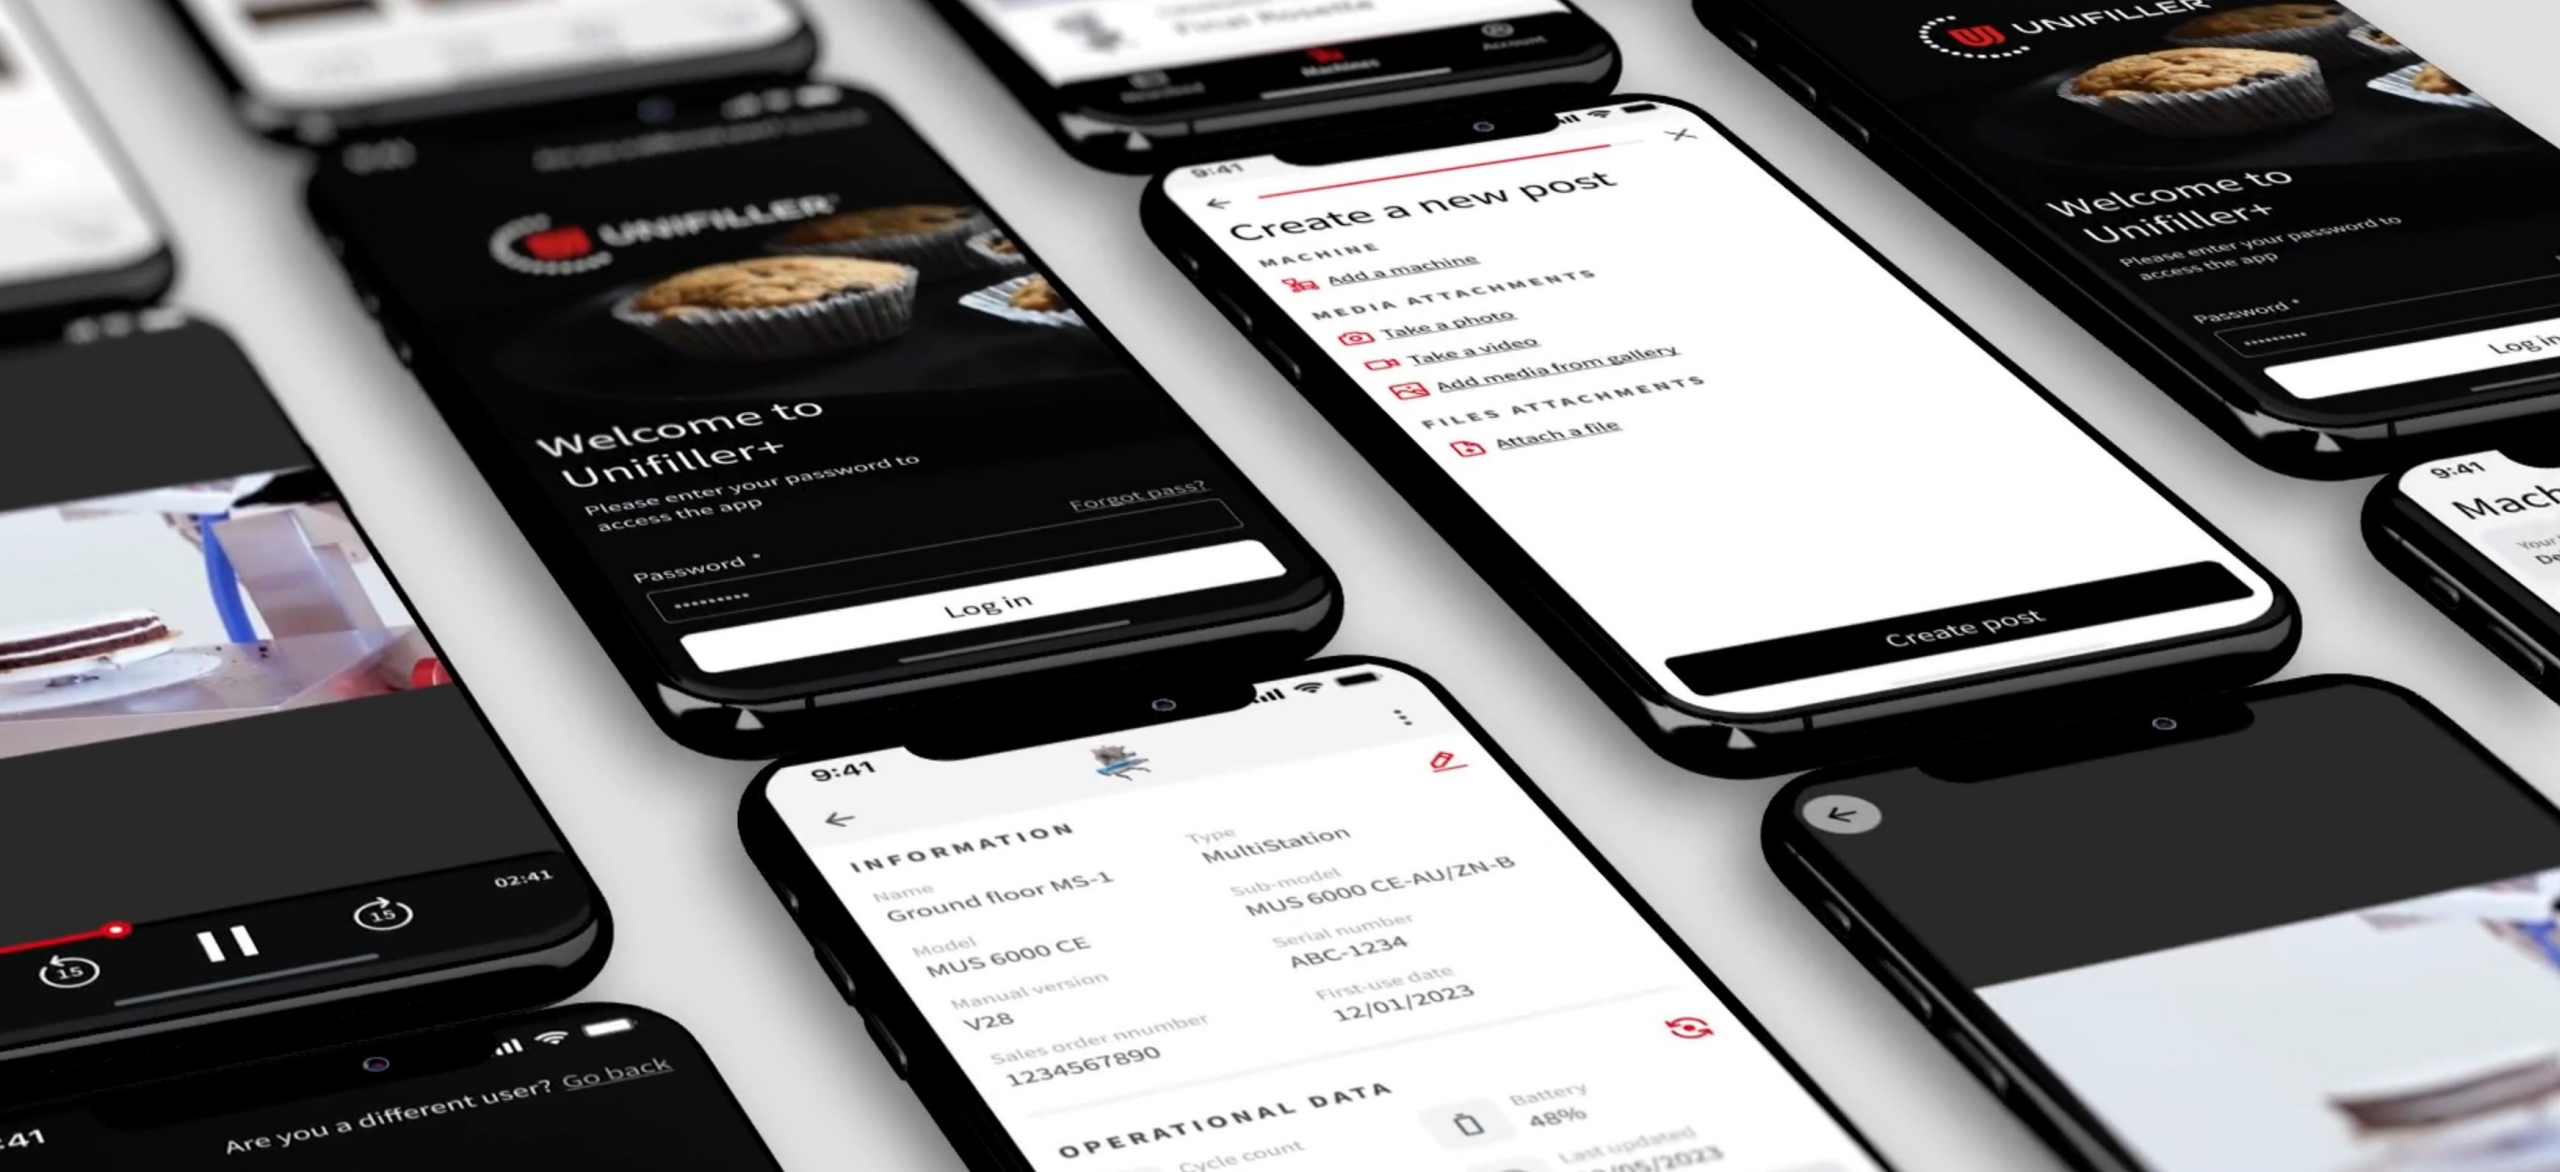

EASY AS 1-2-3!
